

## IN-PLANT CLEANING:

Hot pressure washers increase productivity and minimize worker fatigue by quickly cleaning grease, grime, scale and residual deposits from machinery and other facility equipment. Multiple wash stations are available to have cleaning right at your fingertips.

Maintenance crews and facility managers at food processing plants, Bakeries, manufacturing plants, say pressure washing is a true asset to productivity and improves sanitation and safety up to 80%.

## EQUIPMENT CLEANING:

Hot water and high pressure is the perfect combination to solve your industrial equipment cleaning needs. Wash away excess dirt, grease and oil from forklifts, maintenance trucks and other machinery improving the life and productivity your equipment. Ensure your equipment continues to be a valued asset and improve preventative maintenance with a daily, weekly or monthly cleaning schedule.

Pressure washing will minimize maintenance downtime and equipment repairs.

## FLOOR CLEANING/WATER FILTRATION:

Clean and comply with EPA regulations with several Hydro Tek products. We provide solutions that let you clean your shop floor and vacuum up the wash water in one easy step. If portable wash water recovery is needed we offer the #PVR system, versatile and mobile. Need a stationary system to capture used wash water? We offer a full range of wash water recyclers.

Hydro Tek listened to industrial professionals and maintenance personnel and designed heavy-duty pressure washer equipment for daily in-plant cleaning.

Our pressure washers are engineered with high-quality components to deliver fast and effective cleaning on a continuous basis. You can also wash, clean or sanitize instantly using your existing hot water supply through the pressure washer. Hydro Tek pressure washers allow you to clean away dirt, grease or grime from facility walls, equipment or floors easily with minimal effort. Units are constructed of stainless steel for sanitary environments, corrosion resistance, and years of trouble free service.

Your local Hydro Tek distributor can show you the solution to your industrial cleaning needs and provide professional installation and on-site service.

## HYDRO TEK ADVANTAGES:

- ◆ Fast & Effective
- ◆ Convenient & Easy To Use
- ◆ Powerful & Efficient
- ◆ Versatile / Flexible - The Modern Way
- ◆ Supported by a Network of Service Professionals
- ◆ Certified Safe by Industry Leaders
- ◆ Simple to Install - Custom Installation with Multiple Wash Stations Available From Your Local Distributor

◆ **Stainless Steel Construction:**  
Constructed of 304 Stainless Steel for ultimate protection. Offers lifetime durability and resistance, withstanding harsh environments and tough working conditions.

◆ **High Temperature Compatibility: CW Series**  
Use a hot water supply for even better cleaning performance to save time. Clean with hot water up to 160°F degrees from your existing hot water heater and save the expense of purchasing a hot water pressure washer. For tougher applications an optional hot seal kit will allow you to clean using hot water up to 190° F degrees. Unit shuts off automatically if temperature rating is exceeded, protecting pump from heat damage.

◆ **Unique Mounting Design:**  
This design offers a chassis with an integrated rear mounting bracket for wall mount, saving valuable floor space. Options... Stacker bracket to save space, Wheel kit for portability, Remote wash outlet.

◆ **Front Mounted Controls:**  
Easy access panel for simple adjustments by the operator. The standard hour meter monitors run time for scheduling routine maintenance and preventing downtime.

◆ **CW / CN Series:**  
Pressures from 1200 to 3500 PSI  
Water Flows Up to 4.5 GPM  
Durable Electric Motors  
Belt Drive Pumps  
NEMA 4 Enclosure

◆ **Auto On/Off with Adjustable Time Delay Shutdown:**  
Operator has total control over the system from the trigger gun. This added convenience not only saves time and effort, it reduces wear of the pump and produces an energy efficient system that outperforms the traditional manual on/off.

◆ **Downstream Injection:**  
The CW series is equipped with a downstream chemical injection system. Soap application can be controlled from the gun without returning to the machine. Chemicals and other additives are introduced after the pump eliminating the risk of pump damage.

## HN Ultimate Series Stationary Natural Gas Electric Pressure Washer

Equipment cleaning and facility maintenance is made very convenient at your wash bay with this electric powered natural gas hot pressure washer. It's ready to work when you are without the need to search for a water connection, refill the fuel tank or light the burner.

- Features...**
- Up to 3500 PSI and 8 GPM
  - Automatic Electronic ignition
  - Automatic Time Delay Shutdown
  - 230/460v 3Ph. or 208 & 230v 1Ph.
- Options:** Hose Reel, Propane Kit

Shown with wheel kit option
