

HYDRO TEK

INDUSTRIAL CLEANING EQUIPMENT

June 2006

Product Release

New – 3 in 1 design

Introducing the **ANT3C Contractor Hydro Twister® Surface Cleaner** with the output to tackle big cleaning jobs fast. Two nozzles rotating at up to 2000 RPM increase cleaning power by more than 20 times faster than the use of a wand alone with better cleaning consistency and less operator fatigue. Hydro Tek's exclusive SIX-SHOOTER gum/spot nozzle blasts stubborn spots or imbedded gum with pinpoint accuracy and can be mounted on either the right or left side with a zero tolerance offset ensuring maximum effectiveness to the outer most width of the unit. The handle can be mounted in multiple fixed or floating positions to fit any user and eliminate operator fatigue. An integrated water broom make non-stop cleaning convenient by eliminating the need to disconnect and reconnect tools keeping the Hydro Tek promise of 'Cleans Fast' and constructed from lifetime corrosion resistant stainless steel, heavy duty long life swivel and three permanently lubricated sealed bearings lower maintenance intervals assuring it 'outlasts' the competition.

New water broom design

Hydro Tek's Exclusive
"Six Shooter" Spot Nozzle

Technical Data...

- ◆ Pressure rating 4000 PSI
- ◆ Flows Rate 5-8 GPM
- ◆ Spray Bar speed up to 2000 RPM
- ◆ 28" Coverage Area
- ◆ Temperature Up to 250° F
- ◆ Spinner Nozzle Size 2@ 2.7 GPM

The Features...

- ◆ Performance: Up to 17,298 square feet per hour concrete cleaning coverage
- ◆ Longevity: Stainless Steel Construction
- ◆ Reliability: Long Life Swivel with 3 fully sealed bearings
- ◆ Economical: Three tools in one *Surface Cleaner *(Six Shooter) Spot Remover *Water Broom
- ◆ Efficient: Cleans fast with high RPM Surface Cleaner 20+times faster than a wand alone eliminates additional equipment and tool change times
- ◆ Optional integrated handgun and wand attachment for spot cleaning hard to reach areas
