

Rotary Flat Surface Cleaning Accessory

The **ANT3C Contractor Hydro Twister®** is a surface cleaner with the output to tackle big cleaning jobs fast. Designed with the professional contract cleaner in mind the ANT3C is 3 tools in one: surface cleaner, gum/spot remover, and a water broom. This surface cleaner has zero offset tolerance providing a true 28" cleaning path. Embedded gum or paint spots are easily removed with the exclusive "Six Shooter" spot nozzle. The adjustable handle eliminates operator fatigue and can be full floating, fixed or positioned in the long reach setting for extended reach under areas with height limits and is also removable for easy transport. The integrated water broom design provides fast area cleanup without the need to change tools. *For the best cleaning results, ask your dealer to match your surface cleaner nozzle size to the pressure and flow of your power washer.*

PRESSURE RATING	4000 PSI
